Computer Science & Engineering student at USTC and the builder behind MHR3D. I design and ship full-stack products with Next.js, TypeScript and Cloudflare's edge, then add the 3D, motion and AI layers that make them feel alive. Currently building ShareFlow and exploring explainable health telemetry with STAR PLUS.

SELECTED PROJECTS

ShareFlow

2026

REACT 19 · TYPESCRIPT · VITE · TAILWIND CSS · CLOUDFLARE PAGES · CLOUDFLARE WORKERS

ShareFlow is a zero-login file and secret-sharing platform built around a simple promise: your file should reach the other person without taking up permanent residence on someone else's server. It combines direct browser-to-browser transfer over WebRTC with ephemeral text sharing, a suite of 39+ developer utilities, and a small digital store — all shipped on Cloudflare's edge.

STAR PLUS

2026

NEXT.JS 15 · REACT 19 · TYPESCRIPT · TAILWIND CSS · RECHARTS · THREE.JS / WEBGL

STAR PLUS — Space Telemetry & Astronaut Recovery Physiological Long-term Unobtrusive System — turns dense physiological and environmental telemetry into a mission-ready dashboard. Three roles see the same mission through different lenses: an astronaut's personal health portal, a flight medical officer's triage view, and mission control's operational picture.

BazarDor

2026

NEXT.JS APP ROUTER · TYPESCRIPT · TAILWIND CSS · BETTERAUTH · HIND SILIGURI · LUCIDE REACT

BazarDor (বাজার দর) makes everyday market prices legible in Bengali. It brings today's commodity prices, risers and fallers, category browsing and market-by-market breakdowns into one clean interface, with authentication and a resilient data layer underneath.
